Subject: mobile website

Hi David,

Got you phone message -- thanks for the quick response. Just to make it 'really official', please use this as go-ahead for the mobile website as we discussed recently. For updating the FTP site, please use the same username as we've done in the past, with new password ->(deleted for security reasons)
As I suspected he would be, Jim is very excited about the new site addition. I'd like to say also that we're all very appreciative of the 1st class job you and your team have done for us. I've lost count of the compliments we've received from friends and customers. I've personally spoken to a fair number of professional website optimizers looking for our business who -- even after I've turned them away -- have told me what a wonderful site we have, both in terms of appearance and ranking parameters.

Thanks again, and Best Regards,
Dave
